LLAGOS CATTIVO FORGED WHEELS FOR ALFA ROMEO 4C

Our ultralight forged wheels are **designed, engineered and manufactured in EUROPE** with F1 technology and JWL /VIA, ETRTO, ECE R124 and TÜV quality and safety standards to minimize weight and improve the dynamic behavior of the Alfa Romeo 4C, reducing not suspended masses by 9.25 Kg and with the perfect ET to increase the width of the tracks and the tread width of the tire by 30 mm in the front axle and 60 mm in the rear axle and thus achieve a substantial improvement in dynamic behavior, while achieving a much more sporty and aggressive aesthetic in line with the dynamic approach of this car enhancing the beauty of a car that is a work of art with a forged wheels that are another work of art.

Our Alfa Romeo 4C forged wheels **have passed all demanding European homologation tests and have TÜV §19 (3) StVZO certified homologations No. 2021-8-0600-03-00-00-2021708 for 8x18" and §19 (3) StVZO No. 2021-8-0601-03-00-00-2021708 for 9x19"**, so they have passed the most rigorous safety and resistance tests.

This is a guarantee of the high quality of our product, materials, manufacturing process and how well designed our forged wheels are, it is already very difficult to overcome all the tests with such light forged wheels.

For the manufacture of LLAGOS FORGED wheels we use the best lightest aluminum of the highest quality and resistance.

The aluminum used for the manufacture is of aerospace-grade 6061 with T6 quality tempering treatment, to give more hardness to the surface of the material.

The material is forged at more than 500 degrees of temperature with hydraulic presses at a pressure of 12.000 tons.

The weight is 7.3 Kg for the front wheels and 8.2 Kg for the rear wheels. This weight is in anodized finishing. For painted finishing you have to add around 100 gram per Wheel. The weight reduction compared with stock wheels is around 9.25 kg and around 13.5 Kg if compared with the weight of the stock wheels + the spacers and screws necessary to achieve the same width of tracks as with our wheels.

For Alfa Romeo 4C we have the LAUNCH EDITION and the 33 TRIBUTO EDITION limited editions

LLAGOS CATTIVO LAUNCH EDITION

This special edition is limited to **only 30 numbered sets**. Each set component shows the name of this limited edition and its set number on a carbon fiber plate on its inner surface.

In addition, each set of forged wheels comes with a certificate of authenticity inside an Alcantara folder in GRIGIO LAVA color with ROSSO CATTIVO Stitching with the LLAGOS logo engraved. The certificate includes the numbering of the set within the limited series and a holographic sticker with a QR code.

LLAGOS CATTIVO 33 TRIBUTO EDITION

This special edition is limited to **only 18 numbered sets**, the same number as the units that were produced of the iconic 1967 Alfa Romeo 33 Stradale. Each set component shows engraved the 33 TRIBUTO EDITION logo on its outer surface, as well as the name of this limited edition and its set number on a carbon fiber plate on its inner surface.

In addition, each set of forged wheels comes with a certificate of authenticity inside a natural leather folder in CUOIO TRIBUTO color with GRIGIO LAVA Stitching with the 33 TRIBUTO EDITION logo engraved. The certificate includes the numbering of the set within the limited series and a holographic sticker with a QR code.

They are also offered in 3 special colors exclusively for this limited series, carefully chosen and inspired by the original wheel colors of the 4C Spider Stradale Tributo and the original and iconic 33 Stradale. This exclusive special colors are Oro Tributo, Oro 33 and Argento Villa d'Este.
